With your consent, your child's immunization information will be included in the Texas Immunization Registry. Doctors, public health departments, schools, and other authorized professionals can access your child's immunization history to ensure that important vaccines are not missed. I understand that, by granting the consent below, I am authorizing release of the child's immunization information to DSHS and I further understand that DSHS will include this information in the Texas Immunization Registry. Once in the Texas Immunization Registry, the child's immunization information may by law be accessed by a public health district or local health department, for public health purposes within their areas of jurisdiction, a physician, or other health-care provider legally authorized to administer vaccines, for treating the child as a patient, a state agency having legal custody of the child, a Texas school or child-care facility in which the child is enrolled, and a payor, currently authorized by the Texas Department of Insurance to operate in Texas, regarding coverage for the child. I understand that I may withdraw this consent at any time by submitting a completed Withdrawal of Consent Form in writing to the Texas Department of State Health Services, Texas Immunization Registry.

State law permits the inclusion of immunization records for First Responders and their immediate family members in the Texas Immunization Registry. A "First Responder" is defined as a public safety employee or volunteer whose duties include responding rapidly to an emergency. An "immediate family member" is defined as a parent, spouse, child, or sibling who resides in the same household as the First Responder.
